

Lava Cakes - heating and serving suggestions

Lava Cakes come frozen in a carton of 36, 90g each. The paper patty pan can either be taken off before or after heating. Heat from frozen for 25 seconds or from the fridge for 15 seconds. **Times may vary with different microwaves.**

Serving suggestion:

After heating can be served in the paper cup with a spoon (take away outlets) and dusted with icing sugar. For value added dessert, best with cream and fruit, or coulis and dusted with icing sugar.

The centre should be like a thick sauce that oozes from the cake when opened with a spoon, the outside is a light moist chocolate cake – temperature should be warm – overcooking will solidify the centre.

Information:

Frozen carton of 36 – F400
144 cartons to a pallet
6 layers of 24
Cartons weigh 3.43kg
Lead time per pallet 5 working days.
